

# Copper Assemblies

## Telco Assemblies

Telco assemblies are used to transmit analog or digital data and voice signals for a variety of communication applications. APA Cables & Networks utilizes the highest quality cable to ensure the integrity of your data path.

Standard assemblies include:

- DS1 - 64 position telco assemblies
- DS0 - 50 position telco assemblies

## 25 Pair Category 5 Assemblies

APACNs' 25 pair Category 5 assemblies are designed for applications such as equipment-to-premise wiring and zone distribution. Assemblies comply to Category 5 for transmission data rates up to 100 Mbps.

Stock and custom lengths are available

## DS3 Coax Assemblies

- Coax cable assemblies are constructed of 735, 734 and RG-type grades of cable.
- Connector styles include: BNC, mini-BNC, SMB miniature, SMB, SMA, SMZ, Bantam, WECO, mini-WECO, LLC, right angle and straight connector
- Components from major manufacturers
- Telcordia certified components
- Multi-unit cabling
- Custom breakout lengths to minimize slack
- Variety of bundle configurations and standard lengths
